TRANSPORTATION PLANNING FY 2009 PRIORITIZATION

Due to fiscal constraints and the current KYTC Six-Year Highway Plan being underfunded, KYTC made the decision to minimize the number of unscheduled projects (UPL) to be prioritized during the FY09 priority cycle.

KYTC has reduced this number to put a focus on the projects that received a “double high” ranking in FY09. “Double high” indicates that a UPL project was ranked high by the ADD/MPO,

Regional Transportation Committee and Highway District Office. It is important to remember that projects prioritized as Medium or Low Priorities in 2007 will still remain on the UPL, and still be eligible to receive funding; they were not reprioritized in 2009. A complete listing of projects and maps for the BGADD region will be provided upon request.

Regional Focus

Given the current Kentucky state budget shortfalls, and expected shortfalls during the next budget biennium, it is important to broaden the focus of transportation projects to the regional level.

Looking through the lens of regionalism will allow for a more efficient transportation system to be built and maintained. Infrastructure development will always be intimately linked and tied to the economy and with an increasing population traffic concerns are likely to become more and more numerous. Alleviating traffic congestion, maintaining safety, and providing alternative routes will be key components of traffic management efforts in the future.

The Bluegrass Area Development District has gone through an extensive prioritization process to select projects of the highest regional significance.

Additionally, you will find the top high priority local projects for each county as selected by local elected officials and their staff.

* The Metropolitan Planning Organization's (MPO's) list use different metrics and measures to determine projects.
